

MEMGEL LiTE®

Gel-infused, lively support

Overview

MemGel Lite® is a conventional foam infused with gel for a lively supportive feel, perfect for the top of a mattress in the quilted top panel or in the top comfort layers. It is the perfect, affordable option for strategically adding consumer requested gel to the mattress. MemGel Lite® foam is also CertiPUR-US® certified, meaning it is made without formaldehyde, phthalates, mercury, ozone depleters, and provides low VOC emissions for indoor air quality. Its superior properties are largely a result of the VPF™ manufacturing technology, which ensures consistent high quality and environmentally friendly foam.

Benefits

- Gel-infused for a lively, supportive feel
- Scientifically tested for long-lasting durability and comfort
- Environmentally friendly VPF™ technology
- CertiPUR-US® certified foam.

Gel-infused for a lively, supportive feel

Comfort

Resilient

Support

The superior properties of FXI specialty bedding foams are largely a result of the VPF™ manufacturing technology, or Variable Pressure Foaming, developed by FXI. This proprietary process uses an enclosed chamber to maintain constant atmospheric conditions, delivering a consistently high quality, perfectly formed product with every run. In addition to producing best in class foam, VPF protects our environment with virtually zero emissions, completely eliminating CFCs and other blowing agents that can be harmful.

About FXI

FXI is a leading producer of foam innovation in the Bedding, Furniture, Industrial, Home & Office, Healthcare and Transportation Markets. Our focus is on finding tailored solutions for our customers that are driven by consumer insights and industry trends. Our products include finished goods, sub-assemblies, services and raw materials for OEMs, fabricators and retailers. You will find FXI's foam innovations inside, around and under yourself in countless applications. We protect automobile passengers on the highway, help consumers sleep sounder and furniture manufacturers create comfort. We provide for sharper images in digital printers and help consumers keep their homes clean. We provide critical components for filters, gaskets and seals in everything from blood oxygenators to computer disk drives. Everywhere foam goes; FXI's innovations lead the way.
